- A safe memory

Tapesh Sanat

- **Tapesh Sanat electric lock**

The widespread acceptance of electric locks, after being imported to Iran, made Iranian craftsmen think to produce this product.

In the meantime, Tapesh Sanat company, by acquiring the production technology of this product, produced locks that were approved by global standards and also caused a significant reduction in the price of this product compared to other global brands.

- **Materials**

This lock is made of stainless steel, which increases the strength and safety of these locks. The special shape of the cover of the lock fully restricts any access to the inside of it. It is actually in a way that when the cover of the lock is closed, it covers all parts of the lock even the lock tab and this makes the Tapesh Sanat highly secure.

- **Guaranty**

Our products have a 30-month warranty, which includes breakage during installation, rotting of the body, and push button and cylinder and bobbin failure.

- **Installation**

This lock can be installed on all type of pedestrian doors and inward doors in all dimensions and weights, as well as wooden doors. This type of lock can be installed horizontally on pedestrian doors and vertically on parking doors using hydraulic jacks which is known as a parking lock. Considering the fact that the spring inside the tab of these locks is very strong, therefore, to ensure the complete, slow, and secure closing of the pedestrian's door, it is suggested to use a hydraulic door closer along with the installation of the lock. By scanning QR Code, you can see the installation guide video of this product on our website.
